AMENDMENT TO THE CLAIMS

- 1.(Original) A heating apparatus comprising a heater and a flexible, thermal conductive member, which contacts with the heater, and wherein an object being heated is brought into contact with the thermal conductive member to be heated.
- 2.(Original) The heating apparatus according to claim 1, further comprising therein a space, in which a container containing a gas or a liquid is received.
- 3.(Original) An heating apparatus comprising a heater, a detachable container, through which a gas or a liquid flows, and a flexible, thermal conductive member, which contacts with the heater, and wherein the container is brought into contact with the thermal conductive member to heat a gas or a liquid.
- 4.(Currently Amended) The heating apparatus according to any one of claims

 1 to 3 claim 1, wherein the thermal conductive member is made of a silicone resin.
- 5.(New) The heating apparatus according to claim 2, wherein the thermal conductive member is made of a silicone resin.
- 6.(New) The heating apparatus according to claim 3, wherein the thermal conductive member is made of a silicone resin.
